**Dr. Masao Omata**

President, Yamanashi Central and Kita Hospitals

Professor Emeritus, The University of Tokyo

Masao Omata, MD, has made an effort to revitalize the APASL (Asian Pacific association for the study of the Liver) with Dr. S. Sarin and others for the last 10 years. He is a Co-Editor in Chief of the Hepatology International, an official journal of APASL. He graduated from Chiba University School of Medicine (Dr. Okuda), and continued his training at Yale University (Dr. G Klaskin) and in the Liver Unit at University of Southern California (Dr. RL Peters). After 6 years in US, he returned to the Department of Medicine at Chiba University in 1989, and started molecular biological study on Hepatitis B virus.

In 1992, he became Chairman of Second Department of International Medicine at University of Tokyo, Japan and then subsequently became chairman of Department of Gastroenterology. Under his leadership, the Department of Gastroenterology had become one of the foremost centers in its field.

Now, he is the president of the two hospitals at Yamanashi, west of Tokyo, where, although scenic place with Mt. Fuji, hepatitis virus infection is epidemic and his homeland. He and his colleague have published 1,190 articles in English Literature including, NEJM 5, Lancet 6, Ann Int Med 6, Hepatology 59, Gastroenterology 43. The total impact factor is 7,701 and 50,664 citations with H-index of 115 as of July 1<sup>st</sup>, 2019.

**Dr. Atsushi Tanaka**

Professor

Department of Medicine

Teikyo University School of Medicine, Tokyo

#### Areas of Interest

Autoimmune liver diseases, Viral hepatitis

Prof. Atsushi Tanaka was graduated with M.D. degree in 1988 from the University of Tokyo, Japan. After spending three years as residency at St. Luke's International Hospital in Tokyo, he started his career as a researcher in liver diseases with a main focus on autoimmune liver diseases and viral hepatitis. He obtained his Ph.D. degree from the University of Tokyo in 1996, and thereafter he stayed at the University of California, Davis since 1996 to 1999 as a visiting scholar with M. Eric Gershwin, M.D., where he elucidated T cell mechanisms involved in the pathogenesis and progression of primary biliary cholangitis (PBC).

Coming back to Japan in 2000, he rose through the academic ranks to become a Professor of Medicine at the Teikyo University School of Medicine in 2011. His area of expertise is autoimmune liver diseases, especially autoimmune hepatitis (AIH), PBC, primary sclerosing cholangitis (PSC), and IgG4-related sclerosing cholangitis. He has authored more than 150 peer-reviewed manuscripts devoted to these topics. He has played a central role in publishing as well as revising the Japan Society of Hepatology (JSH) Guidelines for the Management of HBV/HCV infection. Currently he also serves as a PI of the Intractable Hepatobiliary Disease Study Group supported by the Ministry of Health, Labor and Welfare of Japan, and is one of the leaders for research of autoimmune liver diseases in Japan.

He is a member of the Japan Society of Hepatology, the Japanese Society of Gastroenterology, the American Association for the Study of Liver Diseases (FAASLD since 1996), the European Association for the Study of Liver, and Asia-Pacific Association for the Study of Liver Diseases. He recently served as an active member of APASL clinical practice guidance committee for AIH and PBC.
