- To be eligible for the presidents of APASL Annual Meetings, APASL STCs, and APASL-endorsed meetings. To be qualified, you have to be a member at least for 3 years.

School of Hepatology

In 2012, APASL launched the School of Hepatology in Delhi. The purpose of this school is to induct and train a new generation of hepatologists. Applicants are currently practicing physicians / scientists employed in a hepatology-oriented department in Asia. The duration of the course is four weeks. Full details of the School of Hepatology will be announced through the APASL official website www.apasl.info

Fellowship

APASL launched its first fellowship program (APASL Early Career Fellowships) commencing in the year 2014. The objective of the fellowship is to foster career development by encouraging the beneficial experience of working in a different clinical or research environment in another country in the Asia-Pacific region. These fellowships provide for advanced training in health and medical research in any country in the Asia-Pacific region and enable fellows to work in a clinical environment or on a research project with nominated advisers. We appreciate your generous contributions and support for these APASL fellowships and look forward to a number of high-quality applications. An application form can be downloaded by following URL. <http://www.apasl.info/applicationform-fellowship.docx>
Please fill in and send to the APASL secretariat (apasl_secretariat@apasl.info). We are looking forward to receiving your application.

For further information, please access to APASL official website.

APASL

Non-Profit Organization

Asian Pacific Association for the Study of the Liver

www.apasl.info

Towards advancing the science and practice of hepatology

About APASL

Ever since its inception, in August 1978 in Singapore, APASL (Asian Pacific Association for the Study of the Liver) never looks back but stick to its goal towards advancing the science and practice of hepatology. Today it is one of the leading associations based on investigation and treatment of liver diseases in the world and the largest scientific body that upholds the standards and profession, research and create improved treatment methods for millions of liver patients particularly in the entire Asia Pacific Region. APASL's main objectives are to promote the latest scientific advancement and education of hepatology science, exchange of information and the development of consensus, encourage the practice of medicine in liver diseases and also coordinate scientific studies between various scientists and clinicians throughout the region. We hold scientific educational symposia / conferences developed by leading hepatologists periodically.
